Group II. Claims 10 to 13, drawn to a method of sputter coating, classified in class 427, subclass 128.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions **Group II** and **Group I** are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article can be made by a materially different process such as spray coating or dip coating of the layer on to a base.

3. A telephone call was made to Patrick G. Burns, esq. on 02.10.03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
